PROFESSIONAL SUMMARY

Master of Data Science student with 2.5 years of professional experience in software engineering, automation, CI/CD pipelines, reporting, and data analytics. Experienced in Python, SQL, Jenkins, Grafana, PostgreSQL, reporting dashboards, and process improvement. Seeking part-time opportunities in Data Analysis, Research Assistance, Business Support, Administration, QA Testing, and Technical Operations.

CORE SKILLS

Programming: Python, SQL, C++, Bash

Data & Analytics: Data Analysis, Data Cleaning, Data Visualization, Statistical Analysis, Reporting, Dashboarding

Tools: Jenkins, Grafana, Git, PostgreSQL, MongoDB, Linux

Business Tools: Microsoft Excel, Microsoft Office, Google Workspace

Professional Skills: Documentation, Stakeholder Communication, Process Improvement, Problem Solving

PROFESSIONAL EXPERIENCE

Software Engineer | Aumovio (Previously Continental Automotive)

July 2023 – December 2025

- Developed and maintained CI/CD pipelines using Jenkins supporting software integration and testing activities.
- Automated engineering workflows and reporting processes using Python scripting.
- Designed and maintained Grafana dashboards to monitor build performance and operational metrics.
- Developed SQL queries and reporting solutions for engineering data analysis and decision support.
- Integrated security and vulnerability scanning tools into automated software pipelines.
- Collaborated with developers, testers, and engineering teams to improve workflow efficiency.
- Produced technical reports, documentation, and stakeholder-facing analyses.
- Improved software traceability and build reliability through automation initiatives.

PROJECTS

CI/CD Reporting Dashboard

- Designed automated reporting workflows using Jenkins, Python, SQL, and Grafana.
- Developed dashboards to monitor software build performance, testing status, and operational metrics.
- Automated data collection and reporting processes, reducing manual effort and improving accuracy.
- Analysed engineering data to support project tracking and decision-making.

Mars Habitability Simulation

- Developed a Python-based simulation comparing Earth, Ancient Mars, and Present Mars.
- Built habitability scoring models and visualisations using scientific datasets.
- Applied data modelling techniques using Python, NumPy, and Matplotlib.

EDUCATION

Master of Data Science | Monash University | 2026 – 2027

Bachelor of Technology (Information Technology) | KIIT University | 2019 – 2023

CERTIFICATIONS

- Data Science Complete Bootcamp
- GRIP Internship Completion Certificate
- Teachnook Internship Completion Certificate
- Engineering Equity Hackathon – Virtusa

ACHIEVEMENTS

- HackerRank SQL – 5 Stars
- HackerRank Problem Solving – 3 Stars
